

AGA Transmission Clutch Pivot Pin

AGA-CPP-202-659

This AGA CPP replaces BMW Part # 21-51-1-202-659

This AGA pivot pin is made of silicon bronze. It offers superior wear characteristics, especially in high heat and high performance clutch applications where plastic easily fails.

The problem is:

The BMW plastic clutch pivot pin fails or wears out prematurely in some cases, especially if car has high performance clutch or is driven hard. The temperature in the bell housing increases the radiant heat from clutch disc and pressure plate transfers to clutch fork causing failure or excessive wear of plastic pin.

Fitment/ Applications:

528i	E12	535i, is	E28
530i	E12	M5	E28
320i	E21	318i	E30
733i	E23	325, e, es	E30
735i	E23	325i, is, iC, iX	E30
630CSi	E24	M3	E30
633CSi	E24	318i M42	E30
635CSi	E24	735i	E32
M6	E24	525i	E34
528e	E28	535i	E34
533i	E28	M5	E34

Installation Instructions:

To install the pin, simply place pin in hole. Place socket that fits over dome without touching the end of pin. 13mm 12 point socket works well for this. Lightly tap socket with extension until the pin is fully seated. It is normal for the pin to fit tight.

DO NOT hit end of pin with a hammer, punch extension, etc
